EDUCATION

Java Backend Development
Masai
October 2022 - October 2023

Electronics and Communication, B.Tech
Muzaffarpur Institute of Technology
August 2018 - August 2022

TECHNICAL SKILLS

java | Maven | Microservices | liquibase | kafka | RESTful APIs | HTML5 | CSS3

SOFT SKILLS

Adaptability | Time Management

INTERESTS

- Cricket
- Teaching

CERTIFICATIONS

- Full Stack Web Development

raushan kumar

Java Backend Developer

PROFESSIONAL SUMMARY

Dynamic Java backend developer with expertise in Java, Spring Boot, and Hibernate, excelling in crafting efficient server-side applications and seamless API integrations. Leveraging Generative AI for innovative solutions while rapidly mastering new technologies.

PROJECTS

1. PharmaCureHub | ⊕ | ⊙
Java, Spring Boot
- Developed a medicine-related E-Commerce website using Java and Spring Boot.
- Implemented sign-up, login, and admin functionalities for robust user management.
- Built an integrated shopping cart feature for user convenience.
- Developed a file upload and download functionality for prescription management.

2. SandStrom | ⊕ | ⊙
JavaScript | HTML5 | CSS3 | Git
- Collaborated with a team of 4 to implement sign-up/login and admin functionality, ensuring secure access control.
- Developed search, sort, and filter functionality on the products page using JSON server to enhance user experience.
- Worked on the cart page and single product details page, improving user interaction and purchase flow.
- Utilized JavaScript, HTML5, CSS3, and Git to maintain version control and collaborative development.
- Contributed to improving the project with medium-level involvement, focusing on front-end integration and user interface.

WORK EXPERIENCE

Platform Common
Software Developer | May 2024–present
Job responsibilities:
- Developed and maintained Java-based backend systems and APIs adhering to high-quality standards and best practices.
- Worked extensively with Java frameworks such as Spring and Hibernate for developing scalable backend solutions.
